

Dear Hiring Team,

I am excited to apply for the Software Engineer position at Acorns. With over three years of experience in full-stack development, a passion for continuous learning, and a commitment to delivering impactful solutions, I am eager to contribute to Acorns' mission of empowering individuals to achieve financial wellness.

In my recent roles, I have:

- Designed and implemented scalable features using TypeScript, JavaScript, and React, deploying solutions to production environments serving thousands of users.
- Led cross-functional projects, collaborating with diverse teams to develop innovative features that enhanced user experience.
- Applied my understanding of design patterns, algorithms, and data structures to deliver high-quality, maintainable code.
- Contributed to peer code reviews, fostering a culture of collaboration and craftsmanship within engineering teams.

My technical expertise is complemented by strong communication skills—verbal, written, and presentation—enabling me to effectively convey ideas and align stakeholders across teams. I take pride in owning the software I produce, driving improvements, and staying curious about new technologies to ensure cutting-edge solutions.

What excites me most about this opportunity is the chance to develop innovative products that impact millions of users, while contributing to and evangelizing Acorns' engineering culture. My passion for delivering game-changing solutions aligns with Acorns' mission of societal change and empowerment.

I would welcome the opportunity to discuss how my skills and experiences align with your needs. Thank you for considering my application, and I look forward to the possibility of contributing to Acorns' success.

Best regards,
Kavin Karthik
